8. SR 9, New Castle Avenue, Landers Lane to A Street

Funding is requested for implementing the key projects recommended in the Route 9 Corridor Transportation and Land Use Master Plan. Major proposed work includes placing both Route 9 and Memorial Drive on road diets, with saved lane space used to improve pedestrian, bicycle and bus facilities, and provide extra green space. Some intersections will be rebuilt to enhance safety and maintain vehicular traffic flow. Proposals include the construction of roundabouts at Terminal Avenue, Memorial Drive and Cherry Lane, and the reconstruction of Rogers Road/SR 9 and the Stamm Boulevard/SR 9 intersections. A center-lane multi-use pathway is proposed for Route 9 as it passes overtop the I-295 Expressway to be accessed by the two proposed roundabouts at Memorial Drive and Cherry Lane. Other efforts involve better managing truck traffic in the corridor via the provision of an overnight parking facility at the Port of Wilmington and more comprehensive truck signage to discourage illegal truck movements. Additional work will include the recommended extensions of Garasches Lane to Terminal Avenue, Pigeon Point Road to south of I-295, and the road diet preferred for the stretch of Route 9 around Stamm Boulevard.

64. Pavement and Rehabilitation

Funding is requested for the Paving and Rehabilitation program. This program consists of major pavement rehabilitation and pavement resurfacing of state maintained roadway projects. Specific locations are identified annually after the spring inspection.

- **Other Paving and Patching:** This ongoing annual program rehabilitates road surfaces to maintain structural integrity.
- **Surface Treatment:** On less traveled roadways, mostly in Kent and Sussex Counties, the road structure is preserved by a coating of tar and then overlaid with stone. This treatment, in general, lasts seven years.
- **Surface Treatment Conversion:** As areas are developed, surface treated roads become more heavily traveled. They are converted to a two-inch hot-mix overlay surface.

65. Recreational Trails

Funding is requested for the Recreational Trails Program (RTP) which provides Federal Highway Administration funds to states for the development and maintenance of recreational trails and trail-related facilities. This is a statewide program administered by the Department of Natural Resources and Environmental Control. An annual work plan is developed that includes a listing of RTP-funded activities and programs.

66. Bicycle, Pedestrian and Other Improvements

Funding is requested for the design and construction of pedestrian and bicycle facilities, transit access, park and ride facilities, traffic calming and other non-motorized transportation projects. Projects currently include the following:

In Design/Construction (Non Stand-Alone Projects):

- Junction & Breakwater Trail, Rehoboth Avenue Connection;
- Georgetown to Lewes Trail Phase 8, Georgetown town limits to Park Avenue;
- Georgetown to Lewes Trail, Cool Spring Road to Fisher Road;
- Double Bridges Road Multi-Use Trail;
- Capital City Trail Phase II, Gateway to South State Street;
- Capital City Trail Phase III, South Street to US 13;
- Tri-Valley Trail;
- Tri-Valley Trail Phase II;
- Munchy Branch Trail; and
- Miller Road Streetscape Improvements.

In Concept/Other (Non Stand-Alone Projects):

- Bike/Pedestrian Education;
- Fenwick Island Sidewalk Improvements;
- Commons Boulevard Pathways; and
- Newport multi-modal trail.

67. Signage and Pavement Markings

Funding is requested for projects that involve the need for statewide improvements of signage. The goal is to provide visitors and residents with a clear path using appropriate directional signs to eliminate confusion. Additionally, funds will be used to determine improvements including, but not limited to, reflective epoxy striping.

68. Materials and Minor Contracts

Funding is requested to expand the capability of the operating districts to maintain the state's roadways through the development of unit price contracts for small to medium-sized projects. Examples of capital repairs and minor improvements that would be funded by this program include:

- Contracts for adding minor turn lanes at intersections;
- Concrete pavement repairs;
- Repair/replacement of curbs, gutters and sidewalks;
- Traffic control devices (including those necessary for pedestrian, transit and bicycle access);
- Rotomilling;
- Crossover modifications;
- Guardrail installations;

Transportation

- Drainage improvements; and
- Woodland Ferry.

Annual unit price contracts are issued for various types of work to quickly address specific needs as they are identified. These are projects and programs requiring no acquisition of right-of-way, minimal design, no location and/or environmental studies or permits and are administered by the maintenance districts. As stand-alone projects are identified, they will be listed as separate projects in the CTP. In addition, necessary replacements of sign structures, high mast lighting and traffic signal replacements as identified by the Sign Structure Inspection Program are funded through these contracts.

70. Safety Improvement Program

Funding is requested for the Safety Improvement Program, a federally-funded program to identify high crash locations and reduce the severity and frequency of crashes. This is done through identifying locations of crash patterns, conducting field studies and developing potential solutions. After the HEP committee reviews this information, improvement alternatives are developed that include low-cost safety improvements such as signage, pavement marking and/or traffic signal upgrades, guardrail upgrades, maintenance activities and other low-cost type improvements that typically do not require full design or right-of-way acquisition. Other improvements beyond the low-cost safety improvements are also recommended for those locations that require more substantial improvements. Those improvements are moved through the project development process and require full design and sometimes right-of-way acquisition.

71. Traffic Calming Program

Funding is requested for the Traffic Calming Program. Initiated in Fiscal Year 2000, this program involves the design and construction of traffic calming facilities. The Traffic Calming Manual was updated in 2012 to reflect lessons learned and current practices. The program in general involves a community-based approach to study, design and construct traffic calming projects that reduce traffic volumes, travel speeds and provide for increased safety within communities. Traffic calming projects include, but are not limited to, roundabout intersection designs, pedestrian and bicycle facilities, transit access, park and ride facilities, and other solutions to slow traffic. The Department of Transportation (DOT) is working with numerous residential communities to plan, develop and construct traffic calming projects. Study, design and public outreach elements of the residential and development traffic calming projects are funded through this program. Construction for small projects, such as speed humps and radar signs are funded through the sponsoring legislator's Community Transportation Fund (CTF) allocation. Larger projects can be funded with a combination of CTF and DOT capital construction funds.

73. Intersection Improvements

Funding is requested for the identification, design, review and construction of operational and safety initiatives and improvements accomplished through strategic planning, design and/or the installation or modification of traffic control (signal) systems and other related devices. The type of work includes, but is not limited to, design support, construction, construction inspection, right-of-way acquisition, and asset management efforts. Asset management efforts include, roadway lighting, new and upgraded traffic signals, new and upgraded pedestrian signals and associated curb ramps, signal indication re-lamping, maintenance of traffic support for signal work, Manual on Uniform Traffic Control Device revisions, and signal and other traffic related manual updates.

Funding is requested to identify locations and reduce the severity and frequency of accidents. This is done through identifying locations and accident patterns, conducting field studies, and developing potential solutions. The program utilizes a technical committee to review identified locations with a focus towards implementation of low cost high benefit solutions (signing, striping, signals). However the program does identify several locations each year that involve large scale design and capital construction projects.
